About...*

...a revolutionary new approach
for hearing loss, and a hearing
instrument that's nothing like a
traditional hearing aid.

The SeboTek PAC™

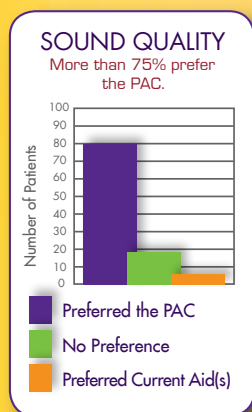

Bringing *Color* to Sound™

SEBOTEK®
HEARING SYSTEMS

Did you know that once we pass age 25, our hearing begins to decline? Hearing loss happens when the hair cells in your inner ear become damaged, and are no longer able to convert vibrations into the sound impulses needed by the auditory nerve.

Just how fast hearing declines can be impacted by other factors, such as genetics or over-exposure to loud noise. Yet by age 50, nearly one in every two people have difficulty understanding conversation, especially in noisy situations.

While hearing loss is a common problem, there is a new solution. Ask your hearing care professional for a trial fitting of the PAC to experience this revolutionary new solution today.

Results of a clinical study in which satisfied hearing aid wearers were asked to compare the sound quality of their current instruments with the SeboTek PAC.

Revolutionary Design & Technology.

SeboTek's patented PAC hearing instrument uses breakthrough design and technology to deliver a solution for nearly all levels of hearing loss.

Superior Sound Quality.

From conversation to live music, the PAC delivers superior acoustic performance.

Unmatched Comfort & Cosmetic Appeal.

You can experience comfort without compromise in a hearing instrument so discreet, it's virtually invisible. And so comfortable, you may forget you're wearing it!

Ask your hearing care professional to fit you with the SeboTek PAC hearing instrument today!

The benefits of hearing instruments may vary based on the type and degree of an individual's hearing loss. Consult your hearing care professional for appropriate advice.
