“This is what I remember hearing was like!”

REVOLUTIONARY DESIGN & TECHNOLOGY.

Hearing: it’s central to every facet of life. Whether listening to your children laugh, sharing a quiet conversation with a friend, or simply enjoying music or the sounds of nature, **it is our ability to hear and participate in the world around us that brings richness to life.**

For those with hearing loss, traditional hearing aids—while beneficial—come with limitations that can be annoying. Squealing at all the wrong times. A plugged up feeling that creates a ‘head in a barrel’ sensation. And amplification that magnifies background noise more than speech sounds.

Now, **SeboTek’s patented PAC hearing instrument has broken the mold on traditional hearing aids, using design and technology to deliver what matters most: simple, clear, natural sound.**

With the goal of creating a hearing instrument that would leave wearers proclaiming, “This is what I remember hearing was like!,” the PAC has been designed to prevent squealing and eliminate the “head in a barrel sensation.” The PAC also amplifies speech sounds through a prescriptive method matched to your individual hearing needs.

No other hearing instrument can match the revolutionary use of technology and design of the PAC. No other hearing instrument simulates the natural performance of the human ear like the PAC. And no other hearing instrument brings “color” to sound like the PAC. **All in a design that’s extremely comfortable, easy to wear and virtually invisible.**

SUPERIOR SOUND QUALITY.

Hands-down, the PAC delivers superior acoustic performance: clear, natural sound. And after all, that’s why you’re interested in a hearing instrument, right? **You want to be able to hear and participate in what’s going on around you.**

With its advanced features, the patented SeboTek PAC is designed to ensure a more true replication and amplification of sound, with emphasis on delivering superior sound quality and enhancing speech sounds no matter what the environment.

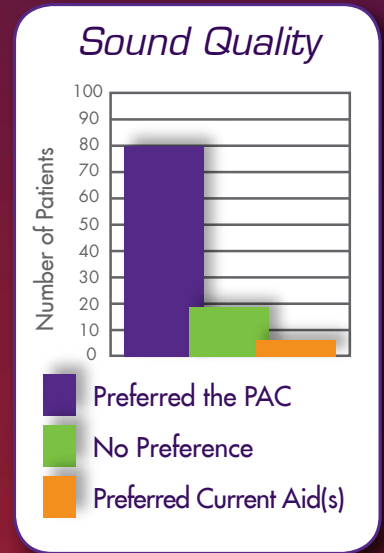

All that, plus Voice-Q™ programmable voice enhancement software, proprietary digital noise management technology, directional microphone technology and telecoil and assistive listening device compatibility—there’s no doubt: **from conversation to live music, the PAC delivers superior performance.**

UNMATCHED COMFORT & COSMETIC APPEAL.

Experience comfort without compromise in a hearing instrument that’s so discreet, it’s virtually invisible. And so comfortable, you may forget you’re wearing it!

ONLY THE PAC offers a discreet, virtually invisible solution for those with mild up to severe hearing losses.

Best of all, because the PAC doesn’t require time-consuming custom ear molds, **you can try it in the office, and wear it home the same day!**

Results of a clinical study in which hearing aid wearers were asked to compare the sound quality of their current instruments with the SeboTek PAC.

REVOLUTIONARY DESIGN & TECHNOLOGY.

SUPERIOR SOUND QUALITY.

UNMATCHED COMFORT & COSMETIC APPEAL.

The SeboTek PAC: Try it for yourself. We think you’ll agree, this is what you remember hearing was like!
